About The Show

At present, artificial intelligence (AI) technology is being utilized in various industries, both in business and services. It is being introduced and applied in numerous ways. In particular, in the food industry, AI is being implemented in agricultural processes, production, storage, and transportation, all the way to retail and customer service.

FOOD PACK ASIA 2025, the leading technology and industrial trade exhibition in ASEAN, is themed **"Empowering the Future: AI Transformations for Sustainable Growth."**

The event showcases automated machinery, packaging equipment, warehouse and logistics solutions, as well as renewable energy sources such as solar cells and electric vehicle (EV) batteries. Additionally, the fair features a wide range of business activities, including networking opportunities, workshops, and business matching events to facilitate effective business relationships between traders and buyers.

Additionally, the event will feature business concepts and knowledge updates from top experts across various fields. This is the only event that will ignite industrial ideas and provide a comprehensive view of the entire supply chain. Attendees will have the opportunity to stay updated on manufacturing industry trends in all forms and receive advice from consultants in both the public and private sectors.
